and an oil used in the vaccine and baking soda is a stopper. This ingredient "oil" by itself is prior art. It does ever include the variations I added into this patent and not the cooking, processing or the plant itself.

A stopper (something to stop any adverse affects to a vaccine) is Baking soda. It causes psychosis. The only prior art stopper is baking soda. (I have many ways to stop this medicine from continuing and this is one.)

Communion in the Holy Bible is Unleavened Bread and wine. Exodus clearly explains Unleavened bread. Wheat, water, oil and possibly a little salt is the biblical recipe made as cake. I changed this so uniquely that this is simply one way of many to remove toxins in the body.

Genesis 1 29:30 All green plants and fruit with seed in it is to be for food. Plants as patentable, but they are all listed in the bible as Green plants. Manna is described as many other things and mine is not. In Genesis, The Bible has the whole plant kingdom.

Silver (I heard someone say it is a cure.)

#### Exhibit I

#### This is a Statement of Use

I have Symptoms in Exhibit A (Except for the Few of Micah's)

This Medicine Works on the Symptoms.

Micah has Bumps or tumors in neck in child; undiagnosed Lymph node illness in child; Diagnosed lymph node illness in child. Her Issues are those and issues and illnesses are in Exhibit A and B for Micah Brooks. I used all the ingredients listed in Exhibits D, F, G, H. Micah only used the Uncooked Version and the ingredients in Exhibit G and some other seeds and greens in her morning oatmeal. When I say uncooked version, I am referring to Exhibit G and cooking the seeds and only heating the other ingredients in the microwave with the seeds for 50 seconds. She has also used many variable recipes for her Attention Deficit Disorder Symptoms. Micah has Attention Disorder Symptoms and also cannot handle sugar. Sugar makes her temporarily insane. The ingredients mixture in this patent removes this problem. If I place too many greens in her foods, the psychosis is back. Exhibit G, the uncooked version was used as breakfast and lunch for Micah for 2 (possibly 2 weeks and 2-3 days) and I completely eliminated a 1 1/2 inch hard tumor like bump on her jaw and the bumps on her right side of her neck. She only had one bump left on her left side and an itty bitty remaining bump on her right side, almost unnoticeable after treatment. I then stopped using the uncooked version on her. Her neck was previously covered in bumps. She went to a MD and a Pediatric Surgeon for 1 1/2 years and they could not remove the bumps. They said they were Lymph nodes. I did it in 2 weeks.

I have been diagnosed with many illnesses included in Exhibit A & B. The Exhibit for symptoms is Exhibit A. I wrote down all my symptoms and problems and diagnosis's for you to prove.

It completely subdued my mood issues. I have no mood disorder at all on my patent. You can easily say that works. Many variations of this patent work on these mood issues. Some recipes that do not have seed last only a few hours. The Recipes with seed, especially rice, last a long time. I do not really know how long exactly. I stopped counting at 30 days. The recipes with little seeds that are black or brown are very potent when brewed with green tea and milk. I add these to my rice and I get a strong drug that eliminates my lip retardation. I sometimes notice that in the mornings my lip retardation might creep back up. After I drink a cup of coffee or two, it is gone again. When I use a low grade drug or a low sesame seed and green tea amount in my patent, my psychosis pops through and I immediately need to take a large dose of a stronger best method. I have used all of these and made one that works best, my favorites in Exhibit G and D. There are many varieties and I need a strong one. I am very sick. I have visual impairments and can watch the wall breathe if I am not medicated. These drugs virtually eliminate this. I have to have a strong sesame seed and caffeine in these drugs to medicate this problem. I would prefer a less strong drug like the last and final recipe in Exhibit G, but I must have the sesame seed and green tea at a strength that eliminates psychosis. The Last recipe in Exhibit G is for the other illnesses. People who are depressed would love it. Poof, no depression. I have had anger problems in my life, zero thought focus or balance, rapid eye movements that could never focus on a dot and a severe reading problem. My mind would fly from thought to thought and I simply had the symptoms in Exhibit A. My whole body was retarded at one point and I kept video of that. The Psychologist never listened to me when I said My lip was jerking or retarded. Actually she listened but since I was already seeing a Psychiatrist, she did nothing about it. The Psychiatrist dissed it. When my lip went into a severe different spasm over Risperdal, he labeled it Tardive Dysconesia and that was his diagnosis. I stopped using Risperdal and the family of those drugs when my leg spasms were out of control. It was way more than that. The retardation was there for before I saw him. I could never sit still and was hyper all my life and no formal diagnosis of Bi-Polar until 2002-2003. The formal Diagnosis was Bi-Polar disorder. A previous diagnosis that a pastor psychologist and his crew diagnosed me with was Multiple Personality Disorder. They were wrong. You must understand Psychosis to see that maybe they picked the wrong page in the DSM. These pastors had no real training and the ones who diagnosed me told me I had been satanically ritually abused when I was too young to remember. Please know that I sued them for this. Another man, who was on the same training staff as this Pastor is being sued for harming another person and his family this way. The man I sued for my MPD Diagnosis, had his license revoked in 2003 in The State of Oregon Case #BCT2001-0006 for another case in Jul. 12, 2001. He trained pastors how to make MPD some spiritual issue and made his clients all believe they were gang raped when they were children. There is a video of his deposition that proves his mind control belief systems. There are many victims of his and his colleagues and these families were all harmed.

My symptoms are listed in Exhibit A. This patent was used by me in many ways as Exhibit C explains. I am very sick. This drug is interchangeable. I can interchange the ingredients to get the same results with different ingredients. I will show you that the symptoms and illnesses in Exhibit A can easily be eradicated, helped, sedated, fueled, medicated, given analgesic benefit to, given narcotic benefit to, removed, alleviated, regulated, solved, pushed out, pushed out toxins, burned, decreased, penetrated, stabilized, improved, anesthe-
